Income Tax Calculator for Government Employees

Release notes and error codes

Version 1.2.0 | Released 27 October 2026 | Techmin Wealth Partners

What is new in Version 1.2.0

- New Feedback panel at the foot of the page: a link to the short customer feedback form for this software, a "Review us on Google" button and an animated link to tools.complypro.co.in. The form asks what developments you expect in the next versions.
- New error code TC-E701: shown if the feedback form is opened while the device is offline.

What was new in Version 1.1.0

- No Techmin logo is printed on any generated PDF. Every page ends with "Generated using Income Tax Calculator for Government Employees v1.1.0 by Techmin Wealth Partners".
- The Techmin Wealth Partners logo replaces the earlier logo in the header.
- New Error codes tab. Every warning and message carries a code such as TC-E101, with a cause and a solution.
- Security: Content Security Policy, clickjacking guard, referrer policy, safe backup restore (size limit, record checks, blocked prototype keys) and protection of CSV exports against spreadsheet formula injection.

Error codes and solutions

Every message carries a code in square brackets. Quote the code when you ask for help.

Code	Type	What it means	What to do
TC-E101	Warning	Arrears in the Form 10E rows are more than the arrears entered in the calculator.	Enter the full arrears in section 3 of the calculator, or reduce the arrears in the Form 10E rows.
TC-E102	Warning	No earlier year has been added in Form 10E Table A.	Add at least one earlier year with its arrears.
TC-E201	Warning	Transport allowance exemption is above Rs 3,200 a month.	Enter the exempt amount only. It is limited to Rs 38,400 a year.
TC-E202	Warning	Housing loan interest is above Rs 2,00,000 on a self-occupied house, or the new regime is selected.	Enter up to Rs 2,00,000. The deduction applies to the old regime only.
TC-E203	Warning	Professional tax above Rs 2,500 a year.	Check the figure against the pay slip.
TC-E204	Warning	Employer NPS is above the percentage allowed under 80CCD(2).	Reduce the claim to the allowed percentage of basic plus DA.
TC-E301	Notice	Save clicked without an employee name.	Type the employee name and save again.
TC-E302	Error	The file chosen for restore is not a backup from this calculator.	Choose a .json file created by Backup in this calculator.
TC-E303	Error	The browser blocked storage, so the employee could not be saved.	Allow site data for this page, leave private browsing, and save again.
TC-E304	Error	A PDF could not be produced.	Check that the figures are numbers, reload the page and try again.
TC-E401	Error	The backup file is too large or has too many records.	The limit is 8 MB and 5000 employees. Split the backup.
TC-E701	Notice	The feedback form cannot be opened because the device is offline.	Connect to the internet and select the feedback link again.

The user guide and release notes of Version 1.0.0 follow on the next pages.

Techmin Income Tax Calculator for Government Employees

Release notes and user guide

Version 1.0.0 | Released 25 October 2026 | Techmin HR Solutions, a subsidiary of Techmin Wealth Partners

About this tool

The Techmin Income Tax Calculator for Government Employees works out income tax for salaried Central and State Government employees, teachers, police, railway and defence civilian staff and public sector employees for FY 2026-27 (AY 2027-28). It compares the old and new regimes, prepares relief for arrears under section 89(1), and prints the statements used in government offices. It runs in your browser and sends nothing to a server.

Web address: https://tools.complypro.co.in/govt-tax-calculator/

How to use it

1. Enter the employee details: name, designation, office, PAN, age category, employer type and place of work.
2. Enter basic pay, DA, HRA and other taxable allowances month by month. Use Copy first month to all months, then change the months that differ.
3. Add arrears, leave surrender, bonus and other income, then the deductions you can prove.
4. Enter the TDS already deducted. The result at the top updates as you type, and the balance tax is spread over the months left.
5. Save the employee, then open Statement and forms to download the documents, and Saved employees and abstract for the office-wide table.

What it calculates

- Old and new regime side by side, with age-wise old-regime slabs (2.5, 3 and 5 lakh).
- New regime slabs of 4, 8, 12, 16, 20 and 24 lakh at 0, 5, 10, 15, 20, 25 and 30 percent.
- Standard deduction of Rs 75,000 (new) and Rs 50,000 (old), family pension deduction, professional tax and the HRA exemption.
- Sections 80C group, 80CCD(1B), 80CCD(2), 80D, 80DD, 80DDB, 80U, 80E, 80EEA, 80EEB, 80G and 80TTA or 80TTB.
- Rebate under section 87A with marginal relief, surcharge with marginal relief, 4 percent cess and rounding to Rs 10 under section 288B.
- Balance tax, monthly TDS for the months left and the break-even deduction at which the old regime beats the new one.

Statement and forms

The Statement and forms tab prints three documents in the layout used in government offices, filled from the calculator:

- Anticipatory Income Tax Statement, with monthly gross salary, deductions, tax, tax already deducted and the monthly instalment to recover, rounded up to Rs 100.
- Form 16 Part B (Annexure), with the Chapter VI-A gross and deductible columns.
- Form 12BB, the declaration of claims for deduction of tax under section 192, with rent and housing loan details.

Employer name and address, TAN, deductor PAN, place, signatory, landlord and lender details are saved with each employee. Anything left blank prints as a blank line to fill in by hand.

Form 10E relief for arrears

Enter arrears in the calculator, then open the Form 10E relief tab. List each earlier year with its arrears and your taxable income for that year. The tool prepares Table A, the relief under section 89(1) and a PDF working sheet, and can carry the relief back to the calculator. Earlier-year slabs from FY 2012-13 are built in.

Things to know about the statements

- Tax is rounded to the nearest ten rupees, so a total can differ by a few rupees from a worksheet that does not round. For example, Rs 1,31,248 becomes Rs 1,31,250.
- The Anticipatory Statement has extra deduction lines (HRA, professional tax, home loan interest and Chapter VI-A) so that old regime figures add up. Form 16 Part B adds a surcharge line when surcharge applies.
- In the new regime, Form 12BB shows only the employer NPS claim.
- These are working documents prepared from your entries. They are not a certificate issued by an employer. The signature, TAN and deductor details must be completed by the person responsible for deduction of tax.

Saved employees and abstract

Save each employee in your browser, then open Saved employees and abstract for one table of salary, tax, tax paid and balance for the whole office, as CSV or PDF. Download a backup file regularly, because browser data can be lost.

What it does not do yet

- Capital gains and other special-rate income are not modelled. Enter only income taxed at slab rates.
- Set-off of house property loss on let-out property, the Agniveer scheme and some rarely used deductions are not included.
- Residents only. Non-resident rules are not applied.
- Form 16 Part B and Form 12BB merge a few lines of the printed forms; for example SLI, GIS and post office deposits are entered under the related 80C items.

Please verify

The Slabs and rules tab lists every rule and says whether it was cross-checked with secondary sources or is still unverified. Items marked unverified, such as the 80CCD(2) percentage for your employer type and the earlier-year slabs used by Form 10E, must be confirmed before you rely on the result.

Disclaimer

This calculator is provided by Techmin Wealth Partners and Techmin HR Solutions (A Subsidiary of Techmin Wealth Partners) for general information and as a planning aid only.
